

PRODUCTS

Advancements in technology have made aging in place comfortable and convenient. Continuum is proud to offer these independence-enhancing products to our clients.

Medical Alert System

Three out of ten older adults will experience a serious fall this year. Getting help quickly after a fall reduces the risk of death by 80% for those over 65 years of age. For times when a caregiver is not present, Continuum's Medical Alert System eliminates the anxiety of falling or having a medical emergency without anyone knowing. The emergency button wirelessly connects to the monitoring device which contacts the 24/7 call center. The operators will dispatch an ambulance if necessary, notify a family member of your situation, or have a neighbor check on you in a non-emergency. Enjoy peace of mind knowing help is always within reach!

- AutoAlert option can automatically call for help if a fall is detected
- Emergency button can be worn as a pendant or wristband
- No long-term contract required

Electronic Medication Dispenser

Continuum's medication dispensers are perfect for seniors taking multiple prescriptions. Nearly half the seniors entering nursing homes do so because they are unable to self-medicate; approximately 30% of hospital admissions for people over the age of 65 are directly attributable to medication non-adherence. We can provide the ideal solution: our dispenser automatically dispenses the correct dosages at pre-set times, allowing for peace of mind and continued independence.

- Loads up to 6 doses per day
- Unit closes under lock and key, not just a latch
- When a dose is ready, an alarm sounds and a red light flashes
- If the dose isn't taken, the 24-hour Care Center is alerted and will call to remind you; if there is no answer, they will notify a family member or friend

To ensure the client's peace of mind regarding usage and operation, a representative is available to perform the installation for an additional fee.
