Advancements in technology have made aging in place comfortable and convenient. Continuum is proud to offer a wide range of independence-enhancing devices to fit you or your loved one's needs.

Three out of ten older adults will experience a serious fall this year. Getting help quickly after a fall reduces the risk of death by 80% for those over 65 years of age. For times when a caregiver is not present, a Medical Alert System eliminates the anxiety of falling or having a medical emergency without anyone knowing. Enjoy peace of mind knowing help is always within reach!

Electronic Medication Dispensers are perfect for seniors taking multiple prescriptions. Nearly half the seniors entering nursing homes do so because they are unable to self-medicate; approximately 30% of hospital admissions over the age of 65 are directly attributable to medication non-adherence. We offer the ideal solution: a dispenser automatically dispenses the correct dosages at pre-set times, allowing for peace of mind and continued independence.

Medical Alert System

- Get fast access to help, 24 hours a day, seven days a week
- Have a neighbor check on you in a non-emergency
- Dispatch an ambulance when necessary
- Notify a family member of your situation
- Emergency button can be worn as a pendant or wristband
- No long-term contract required

Electronic Medication Dispenser

- Reminders up to 6 times a day
- Holds up to 60 doses of medications
- When a dose is ready, an alarm sounds
- If the dose isn't taken, the 24-hour Care Center is alerted and will call to remind you; if there is no answer, they will notify a family member or friend
- Meds are secure under lock and key
